

ROLE-ALIGNED PROFILE

Enterprise AI workflow engineering grounded in real operations.

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. Direct experience designing AI-assisted workflows, human review, governance rails, operating measures, and cross-functional technical systems.

MOST RELEVANT EXPERIENCE

Vape-Jet Director of Operations	2025–Present
- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows. - Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability. - Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.	
DudeWorth Founder / AI and Automation Advisor	2017–Present
- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value. - Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails. - Advises on AI-enabled operations, logistics technology, warehouse automation, autonomous mobile robots, transportation systems, network analysis, and workflow design.	
Amazon Operations Management / Site Leader	2014–2018
- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually. - Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms across safety, quality, customer experience, and team engagement. - Served on the Amazon Prime Now launch team with Whole Foods and contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.	

ROLE FIT

- Process-owner discovery
- Prompt and agent workflow design
- RAG and structured context
- Human-in-the-loop authority
- Evaluation and edge cases
- Governance and escalation
- Adoption and operating measures

TECHNICAL TOOLKIT

- Agentic AI · LLM workflows · RAG
- Python · SQL · JavaScript
- TensorFlow · Tableau · Odoo
- Jira · Confluence · HubSpot · Slack

HOW I ENGINEER AI WORK

- Outcome before interface.
- Approved context before retrieval.
- Authority before tool access.
- Evaluation before scale.
- Human decision before consequence.
- Telemetry before optimization.

ENGINEERING, QUALITY, AND REGULATED SYSTEMS

Compunetics

2000–2013

Director of Operations and Engineering Management

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD; published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

ZeusVu

2018–2022

Chief Pilot, Autonomous Systems and Aerial Data Operations

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

Cardinal Building Products

2021–2023

Regional Director

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ADDITIONAL LEADERSHIP

Enviro Social Capital

2014–2017

Chairman of the Board

- Co-founded and led a public-private impact initiative; helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh green-infrastructure improvement.

IEEE

2012–2016

CMPT and EDS Pittsburgh Chapter Chair

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

EDUCATION

University of Pittsburgh
Bachelor of Science
Academic grounding includes materials science, physical chemistry, and biology-related studies.

CREDENTIALS

- Google AI Essentials
- Food Safety Management Certification
- IBM Enterprise Design Thinking Practitioner
- Six Sigma Certification
- OSHA 10

OPERATING MEASURES

- Labor hours and intake delay
- Cycle time and rework
- Completeness and traceability
- Overrides and escalations
- Recurring machine and quality issues
- Adoption and completed outcomes

CANDIDATE THESIS

Scale the work—not just the prompt.
An AI-assisted workflow should carry its context, permissions, evaluation evidence, human decision rights, and operating record with it.
