<https://russelldudek.github.io/PNC/>

Independent candidate-created worksheet for governed AI workflow discovery

Use this review before release and after material workflow changes. It is a conversation mechanism, not a claim about PNC internal process.

1. Business intent

☐ Named user and task

☐ Decision or action affected

☐ Expected outcome and baseline

☐ Known exceptions and failure consequence

Evidence / owner / unresolved condition: _____

2. Approved context

☐ Authoritative sources

☐ Freshness and version rules

☐ Data classification

☐ Retrieval and citation boundaries

Evidence / owner / unresolved condition: _____

3. Tool authority

☐ Identity and permissions

☐ Allowed tools and actions

☐ Transaction limits

☐ Fallback and rollback

Evidence / owner / unresolved condition: _____

<https://russelldudek.github.io/PNC/>

Evaluation, human authority, operating record, and disposition

4. Evaluation evidence

☐ Representative cases

☐ Edge and adversarial cases

☐ Groundedness and completeness

☐ Regression and acceptance threshold

Evidence / owner / unresolved condition: _____

5. Human decision

☐ Approval checkpoint

☐ Override and escalation

☐ Accountable owner

☐ User notice and recourse

Evidence / owner / unresolved condition: _____

6. Operating record

☐ Prompt and component version

☐ Inputs, sources, calls, outputs

☐ Human changes and exceptions

☐ Outcome, incident, and cost telemetry

Evidence / owner / unresolved condition: _____

Release disposition

☐ Assist - human performs and approves the work

☐ Controlled pilot - bounded users, monitoring, and rollback

☐ Scale - controls, evidence, ownership, and support are ready

☐ Hold - one or more clauses are unresolved

☐ Stop - value, feasibility, safety, or economics do not justify continuation

Decision record

Decision owner: _____ Review date: _____

Primary evidence: _____

Conditions before next release: _____

Next review / monitoring trigger: _____
